5) Notice of Informal Patent Application (PTO-152)

#### **DETAILED ACTION**

#### Election/Restrictions

This application contains claims directed to the following patentably distinct species of the claimed invention: the slidingly engageable projection portion of Figures 1-3, 7, 8, and claims 8, 14, 18, 24, 25, and 27-29, the pivotal couplers of the main support of Figures 15-17 that hingeably receive the support members of claims 30-39, and the rung receiving adaptors of Figures 18, 19, claims 40-46.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, claims 1-7, 9-13, 15-17, 19-23, and 26, are generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the

Art Unit: 3634

examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

During a telephone conversation with Mr. Mark Roberts on March 11, 2005 a provisional election was made without oral traverse to prosecute the invention of Figures 1-3, 7, 8, claims 8, 14, 18, 24, 25, and 27-29. Affirmation of this election must be made by applicant in replying to this Office action. Claims 30-46 are withdrawn from further consideration by the examiner, 37 CFR 1.142(b), as being drawn to a non-elected invention.

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

## Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-29 are rejected under 35 U.S.C. 102(b) as being anticipated by Kummerlin et al #4,359,138. Kummerlin et al, as best seen in Figures 1, 2, and 4, disclose a ladder attachment comprised of a ladder attachable main support 1, the ends of which serve as non-circular

Art Unit: 3634

coupling members that slidingly and axially receive projecting portions/engagement arms 10 of elongate support members 13, together along with support arms 14 form support modules 12, the support arms being attached to the elongated support members at a distal end located near the first set of locking pins 15, 16, opposite from a proximal end of the elongated support member that extends beyond (spaced apart from) and orthogonal to the projection portions/engagement arms 10, and securing mechanisms 11, which secure the projecting portions of the support modules to the main support 1.

### Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Wing #4,502,566, Miller #4,932,498, Ashley #5,242,031, and Williams et al #5,261,507 are cited to teach ladder attachments.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Hugh B. Thompson II whose telephone number is (703) 305-0102. The examiner can normally be reached on Monday thru Friday 9 am to 5:30pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Peter Cuomo can be reached on (703) 308-0827. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
